Dear Customers

My name is Edwin Lingg, I am the owner and Managing Director of the LICO factory located in 7537 Müstair / Switzerland. www.lico.ch

In mine own name and the mine of our company LICO, I want to make an official explanation about LICO's products and material which we produce.

All our products which we produce in different sizes, colours, different variants of varnishes/top layers (PU-varnish, HotCoating) fulfill all international requirements and have all relevant certificates. We don't offer different qualities.

For clarity I should explain the situation on the Russian market. Li&Co AG has two representatives on the territory of Russia. These are Ruscork and CorkStyle, they have their own brands which they promote on the Russian market.

We decided together that Ruscork won't use the Lico brand in 2019 anymore, also not the packaging. However there is still a big stock by Ruscork of produced material in 2018 which is top quality packaged in LICO boxes.

Also in 2019, products which will be imported by Ruscork's and CorkStyle's brands will be with the same quality. We will divide mainly our product range between our two representatives and everything that will be imported with these brands will have no differences - it will be products manufactured by the LICO factory.

We invite you to cooperate with our partners in order to present in the retail network all the products of the LICO factory under the RUSCORK and CorkStyle brands.

Best regards

Edwin Lingg
